Tire  
Wear-Resistant  
Durable Wheels  
Original Manufacturer Wheels

Place card into tire tread as shown. Be sure to check the tread depth at several points on each tire. Green indicates optimum tread depth. Yellow suggests compromised performance in rain or snow. Red indicates unsafe tread depth.

- Optimum tread depth for peak performance
- Reduced performance in rain / snow
- Unsafe tread depth - replace tire now!

For professional installation, please contact your Sin City Wheels and Tires representative for location details.
